

Princess V45, 2011

Princess V45 is designed to offer performance, style, and comfort – especially for those who appreciate the thrill of life at sea without compromising on luxury. This particular vessel has been meticulously maintained and used privately in the Baltic Sea region. It has always been stored in a heated hall during the winter months. The level of equipment is high, and several significant upgrades have been made in recent years. The Princess V45 has received praise for the way it combines a sporty driving experience with the comfort of a cruiser. Handling is one of this boat's strongest assets and clearly sets it apart from others in its class. Cruising speed is around 25 knots, and the ride remains stable even at higher speeds. Bow and stern thrusters, along with joystick control, make docking effortless. This boat offers everything needed for a comfortable voyage or holiday – all wrapped in elegant design. Two full-height, private cabins provide accommodation for two couples or a family. Each cabin also has its own WC and shower. The spacious and bright saloon is complemented by a well-equipped galley. In the summer, the large cockpit serves as a second living room, complete with an outdoor kitchen.

Price: 299.000€, EU VAT paid

Location: Helsinki, Finland

Measurements:

Hull length: 14,35m

Beam: 3,99m

Draught: 1,07m
